INTRODUCTION

The 11th campus of UiTM, UiTM Cawangan Pulau Pinang, started operation on 6 June 1996 in Permatang Pasir. In the beginning, the campus focused only on Civil and Electrical Engineering courses at diploma level. The campus was later relocated to Jalan Permatang Pauh in August 2003. Today, UiTM Cawangan Pulau Pinang also offers Mechanical Engineering, Chemical Engineering, Hospitality and Tourism, Business, Pharmacy, and Health Sciences courses at diploma, degree, and postgraduate levels. UiTM Cawangan Pulau Pinang is the perfect place to visit to develop enthusiasm in education, particularly in engineering and hospitality courses.

FACULTY OF HOTEL AND TOURISM MANAGEMENT

OPTION 1:

COOKING with the STAR

Can you imagine cooking beside a celebrity chef in the kitchen? Well, it will be an amazing experience and you should not miss it! Fulfill your dream by joining our kitchen where you will learn three (3) selections of food and this session will be conducted by a famous celebrity chef or certified (trained) chef with years of experience.

RM69.00*/pax

**Minimum of 30 pax
*Price inclusive of a cooking session with a chef and a certificate
Price subject to change

OPTION 2: FOOD-IPSTER

Camera ready? 3, 2, 1..action! This is not a dialogue from a film set, but it is a food styling session in the lab. Food is the main star in our session and the instructor will guide you with the correct technique on how to snap food photo for commercial purpose.

RM49.00*/pax

*Minimum of 30 pax
*Price inclusive of a food styling class and a certificate
* Price subject to change

OPTION 3: TABLE ETIQUETTE

Good table manners require you to observe a number of civilities and procedures, from the proper use of your napkin, buttering the bread till enjoying your coffee and dessert. Don't miss the chance to learn from professional instructor where you will be exposed to lecture-practice concept about good table etiquette. Come, let us guide you!

RM79.00*/pax

*Minimum of 30 pax
*Price inclusive of a table etiquette session and a certificate
* Price subject to change

OPTION 4: PASTRY LOVER

Would you love to play with dough of flour? If yes, come and join our kitchen and learn the basic pastry skill and make your own pastries. There are three (3) selections of pastries that are readily available under the professional supervision from our certified instructor.

RM59.00*/pax

**Minimum of 30 pax
*Price inclusive of a pastry cooking class and a certificate
* Price subject to change*

* Price subject to change*

The Magical World of Gastronomy

Food trail in George Town and journey to the past:

Don't miss the golden opportunity to discover the food trail in George Town and travel back to the past by dining and visiting fantastic food outlet and museum. Come, let us take you there!

MY JOURNEY AS A JUNIOR ENGINEER

Tour: A one day visit to Mechanical, Electrical or Civil Engineering Labs

Activities: The package offers opportunity to experience laboratory activities provided by any of the 2 engineering faculties.

RM38.00*/pax

**Minimum of 20 pax*

**Price inclusive of laboratory visit, meals, and a certificate*

** Price subject to change*

OPTION 1: FACULTY OF CIVIL ENGINEERING

***Have you seen the various types of rocks?
Do you know that rocks originated from soil?***

Watch closely the various types of rocks and you can characterize them based on the color, texture, hardness, and formation of the rocks. Video presentation on lab works, e-visit to the Grand Canyon, and many more exciting activities from the geology lab. The Gold Award winner program on the massive open learning center 2017 is part of the existing trip to our laboratory.

OPTION 2: FACULTY OF ELECTRICAL ENGINEERING

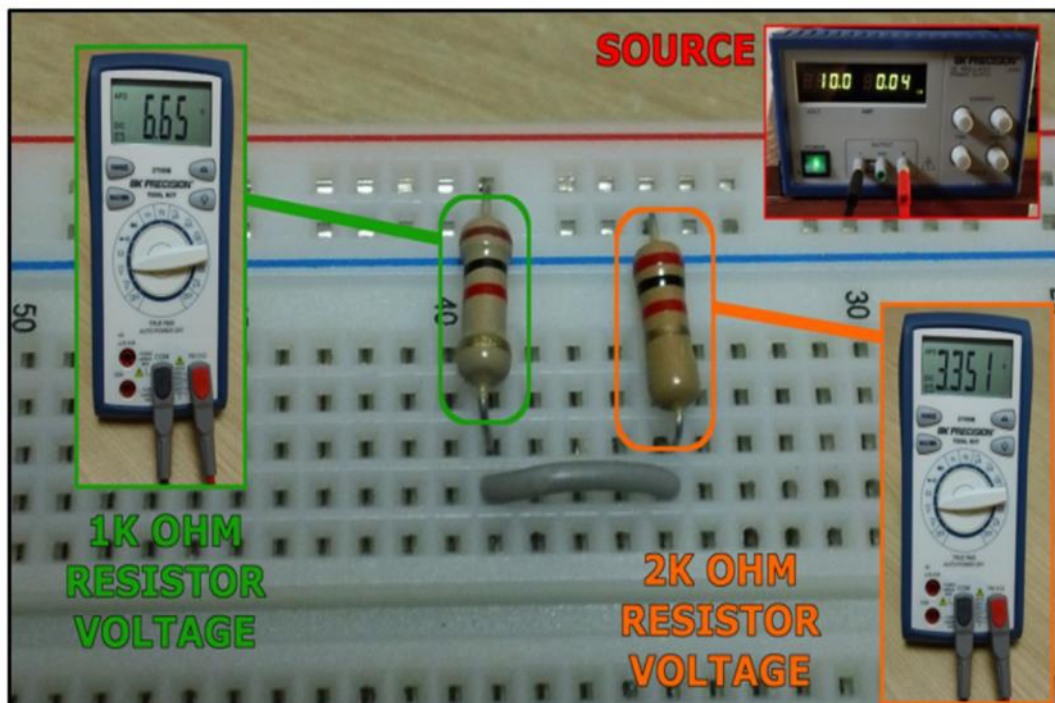

Fancy of becoming an ELECTRICAL ENGINEER? An exposure to the basic concept of renewable energy (solar photovoltaic system), as well as hands-on project will be carried out during the visit. You will be able to experience on designing a simple circuit consisting of sensors and signal conditioning. And the most interesting part is learning on how to power up the developed circuit using solar module (renewable energy resources).

Soldering process

Troubleshooting process

Design circuit

OPTION 3: FACULTY OF MECHANICAL ENGINEERING

Plastic injection molding (PIM) is a manufacturing process in producing parts by injecting material into a mold. This PIM process will be demonstrated by an Assistant Engineer. The PIM machine is used to produce small plastic parts such as plastic gear, plastic ware, etc. The plastic material used for this process must be melted at temperature between 60°C to 100°C. Then, the molten plastic will be injected into the closed and shaped mold. The plastic part will be cooled. Finally, the mold will be opened and the part will be removed. The final product will be presented as a souvenir. You will be attired in a complete suit (jacket, safety helmet, and other required PPEs) during the session for safety purposes.
