ACADEMIC OPERATION UPDATES 2/4

As we embark into online learning and ODL for this semester, we must **OBSERVE** another important aspect to compliment this process. It is the **internet accessibility of students** to follow their lessons from their locations. Therefore, please take the following action seriously and promptly:

1. Lecturers must **ensure** none of your students are left behind due to lack of internet access.
2. Lecturers are encouraged to form a WhatsApp group or other means with your students, so they can be **constantly engaged**.
3. To address this issue, lecturers **MUST** make an **internet-access-capability survey** to all your students to identify what T&L approach is suitable for their group and who needs help.
4. Please **submit** this survey result or progress to your KPP or KP for further analysis and action with HEA.
5. FYI, BHEA UiTM Shah Alam is currently working to give lecturers some information on internet accessibility by regions of the country. With students address and subject codes they are registered in our system, we're hoping to be able to map it up and give information to lecturers of their student's accessibility to internet.
6. MEU has agreed to help the B40 students with some funds so that they can buy their data plan so they won't missed out from their lessons.
7. So lecturers, please stay vigilant to this issue, it is no more business as usual, especially in this difficult time.

Stay safe & stay alert with academic information updates.
